<https://risheetasingh.vercel.app>

Product Designer with 1.6 year of experience designing end-to-end UX for AI-powered platforms, conversational interfaces, and scalable design systems. Sole designer at an early-stage startup, owning everything from user research and wireframing to Figma systems and developer handoff.

WORK EXPERIENCE

Spectatr.ai

Aug' 25 – Jul' 26

Product Designer

- Sole designer; increased new user onboarding by 70% by simplifying complex AI agent interactions through iterative prototyping and usability testing.
- Architected a variable token system in Figma that reduced developer handoff time by 30% and unified UI across 5+ core modules.
- Designed end-to-end UX for an AI video intelligence platform (computer vision, NLP, facial recognition) enabling creators to auto-analyze, transcribe, and search video libraries without manual review.
- Designed conversational UX for an AI sports assistant; refined response behavior through LLM-based testing and iterative prototyping.

Spectatr.ai

Feb' 25 – Jul' 25

Product Design Consultant

- Led end-to-end UX for Jordy, an AI-powered sports platform delivering real-time insights, fantasy updates, and interactive content across cricket, football, and basketball.
- Contributed to the Media Library, a centralized hub for AI-generated sports clips, supporting 9:16 formatting, multi-language content, and metadata management.

Pantone Collective

2022 - 2024

Interior Designer

- Executed retail, hospitality, and residential projects end-to-end; led client meetings and coordinated across design and branding teams.
- Work featured in Vogue India and Condé Nast Traveller for design excellence in hospitality projects.

EDUCATION

Arch College of
Design & Business

2018 - 2022

Bachelor of Design in Interior Design

SKILLS

Tools: Figma, FigJam, Framer, Paper, Claude Code, SketchUp

Design: UX/UI Design, Design Systems, Interaction Design, Wireframing, Prototyping, Visual Design,

Process: User Research, Usability Testing, Developer Handoff, User Journey Mapping, Cross-functional

AI Workflows: LLM Interface Design, Conversational UX, AI-assisted Design (Paper MCP, Claude Code)
